

GEORGE KOSTOPOULOS

George Kostopoulos

George K. Kostopoulos M.D., PhD. is Professor Emeritus and past Chairman of the Department of Physiology at the Medical School of the University of Patras, Greece. He has taught several courses on neurophysiology, neuroinformatics and bioethics. In 1982, after several years' work with the Departments of Neurology and Physiology of McGill University, Canada, he established the Neurophysiology Research Unit at UOP, which conducts experimental neurophysiological research on the neuronal mechanisms underlying brain EEG rhythms, memory, epilepsy and sleep (more information and publications).
