

PANOS KOUROUTHANASSIS

Panos Kourouthanassis

Dr. Panos Kourouthanassis is Professor of Information Systems and Electronic Business at the Department of Informatics, Ionian University, Corfu, Greece. He is currently Dean of the Faculty of Information Science and Informatics and Director of the Information Systems and Databases Laboratory (ISDLAB) of the Ionian University. His main research interests lie in the fields of electronic business, electronic entrepreneurship, and information systems management. He has published in leading international scientific journals and conferences (including the Journal of Strategic Information Systems, the Journal of Business Research, Expert Systems with Applications, Information and Management, the Journal of Travel Research, and the Journal of Information Technology). Dr. Kourouthanassis has extended research and consulting experience.

He has participated as principal investigator and/ or lead researcher in more than 40 innovative research and development projects funded from national and European sources. Moreover, he was the principal investigator in a plethora of consulting studies in the fields of financial technologies (fintechs), digital organizational transformation, electronic supply management, and public services digitization. His current research explores the disruptive potential of emerging technologies (e.g., artificial intelligence and Blockchain technologies) as drivers for innovation and entrepreneurship. He is also a member of the scientific committee on a variety of activities related to innovation and entrepreneurship (e.g., eVolution Awards, eNnovation student competition awards, and many other innovation-related activities).
