### OVERVIEW

“Breaking Barriers with Generative Intelligence “ delves into how GI in AI improves human education and well-being. Using deep and machine learning, GI creates content and solutions to enhance cognitive abilities. Unlike traditional AI, GI focuses on boosting human thinking. Experts from academia, industry, and government gather to discuss AI ethics and societal impacts. Participants engage in talks, panels, and workshops to address ethics, promote diversity, and foster inclusive AI development.

The event aims to promote collaboration among academia, industry, and government, providing a networking platform for knowledge exchange. Participants showcase GI applications through creative efforts and case studies in various industries. Talks discuss GI's potential for societal impact and positive change across sectors, encouraging interdisciplinary collaboration and solution co-creation.

Join us as we examine the revolutionary power of AI technology and pave the road for a more inclusive and equitable future.
