

Sotirios Chatzis

Prof. Sotirios Chatzis is a Professor in the Department of Electrical Engineering and Computer Science and Engineering at the Cyprus University of Technology, where he also serves as Department Chair and Director of the Generative Machine Learning Lab. He holds a PhD in Statistical Machine Learning and has held research positions at institutions including Imperial College London and the University of Miami.

His research focuses on generative AI, with emphasis on diffusion models, multimodal large language models, and trustworthy AI systems. His work spans applications in recommendation systems, natural language, and video, with a particular focus on efficiency, robustness, and unbiasedness. He has led and contributed to multiple European-funded research projects and actively contributes to the development of AI strategy at both institutional and national levels.
